DETAILED ACTION

The Office Action is in response to After-Final amendment filed July 18, 2007. Claims 1-3, 5-19, 21-27, 54-59 are presented for further examination.

Response to Arguments

The Office notes the following argument(s):

- (a) Lachman I (US Provisional 60/272,712) does not prevent further transmission of packets until Lachman determines whether the packet sniffing assessment of a possible threat is accurate.
- 1. Applicant's arguments filed have been fully considered but they are not persuasive.

In response to:

(a) The provisional application (Lachman I, 60/272,712) for which Lachman II (US Patent Application Publication 2002/0166063 A1) claims benefit discloses subject matter which is described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application (US Patent Publication 2002/0166063 A1) was filed, had possession of the claimed invention. Therefore, Lachman II can be used as prior art against the instant application.

Particularly Lachman I discloses performing a series of pattern matching operation on each incoming packets. The pattern matching operations is used to compare known or learned attack patterns to data. Once an attack is recognized from the pattern

Application/Control Number: 10/037,593

0457

Art Unit: 2157

matching, a countermeasure will be placed in the router blocking all traffic to and from the attacking network. The pattern matching is used to detect an attack. The attack is recognized based on the pattern matching technique (see pages 5-8 of Provisional Application, 60/272,712).

Therefore, Lachman I indeed teaches "the DED is operable to prevent further transmission of the one or more data packets based on the content match information" as claimed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara N. Burgess whose telephone number is (571) 272-3996. The examiner can normally be reached on M-F (8:00am-4:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Ettinene can be reached on (571) 272-4001. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
